PRATIK BALAJI

Philadelphia, PA 19122

(346) 446-8717 balajipratik8@gmail.com LinkedIn GitHub Kaggle Portfolio

EDUCATION

Temple University Philadelphia, Pennsylvania

Bachelor of Science, **Data Science with Computational Analytics** **Expected Graduation: 2027**

Relevant Coursework: Calculus I-III, Mathematical Concepts In Computing I-II, Data Structures & Algorithms, Computer Systems & Low-Level Programming, Principles Of Data Science(s), Linear Algebra, Principles of Database Systems, Probability Theory

Extracurriculars: Temple Data Analytics Club, Temple Data Science Community, Research Scholars Club

SKILLS

Programming Languages: Python, C, C++, Java, JavaScript, SQL, R, Bash

Technical Stack: TensorFlow, PyTorch, MongoDB, scikit-learn, Pandas, NumPy, Flask, FastAPI, Docker, Git

Adobe Tools: Adobe Experience Platform (AEP), Real-Time CDP, Customer Journey Analytics (CJA)

Other: Cloud Computing, ML/AI, Quantitative Research, Data Visualization, AWS, EDA, AI Agents, n8n, IoT

WORK EXPERIENCE

Auxilior Capital Partners Inc., Plymouth Meeting, PA **May - September 2026**

Information Technology Intern

- Running AI operations under VP leadership to integrate automated tools and optimize secure financial systems
- Automate data workflows and deploy custom AI agents to streamline internal reporting and enhance efficiency

YAN IT Solutions PVT. LTD., Pune, Maharashtra **June - September 2025**

Data Analyst Intern

- Implemented Python pipelines to process IoT sensor data from MongoDB
- Monitored device health and predicted refill needs with machine learning (Linear Regression)
- Achieved a 40% improvement in predictive accuracy and a 35% reduction in downtime for over 230 devices
- Developed a FastAPI-based web service and dashboard for live health status and refill trend visuals
- Deployed solutions to Azure App Services with secure configuration and scalable design

PROJECTS

SSP - Startup Success Predictor **Spring 2026**

- Built ML pipeline with 4 models (Random Forest, XGBoost, Gradient Boosting, Logistic Regression)
- Applied label encoding and StandardScaler to preprocess categorical and numerical features
- Developed Flask REST API with probability-based predictions across 3 success classes (IPO, Acquired, Private)
- Deployed model to production using WSGI server; model achieves 69.6% CV score and 70% test accuracy

AURA ATLAS - Agentic Geospatial Wellness Network **Spring 2026**

- Architected Mapbox GL JS 3D routing with bounding box constraints, cutting false-positives by 40%
- Developed a Next.js navigation HUD with an emotional weather system, accelerating decisions by 60%
- Engineered a 2-step proximity search algorithm and AR using GPT 4o, achieving 95% success for local landmarks
- Optimized React state-management for map rendering, ensuring zero-latency transitions across 11 cities

AROMA - Agentic Restaurant Order Management Automation **Fall 2025**

- Automated restaurant order processing via n8n agentic workflows, cutting manual time by 40%
- Integrated a Vapi conversational AI voice agent to manage inbound customer inquiries
- Engineered a real-time WhatsApp order notification system, decreasing follow-up calls by 60%
- Synchronized voice, order, and messaging systems to achieve a 95% automated response rate

CERTIFICATIONS

AI: AI & Productivity (Google), Generative AI Mastermind (Outskill), AI Agent Fundamentals (Databricks)

Development: Quantitative Research J.P Morgan (Forage), Software Engineering J.P. Morgan (Forage)

Other: Claude Code In Action (Anthropic), SQL Essential Training (LinkedIn), AWS AI Practitioner (Udacity)
