EDUCATION

Temple University Philadelphia, Pennsylvania

Bachelor of Science, **Data Science with Computational Analytics** **Expected Graduation: 2027**

Relevant Coursework: Calculus I-III, Mathematical Concepts In Computing I-II, Data Structures & Algorithms, Computer Systems & Low-Level Programming, Principles Of Data Science(s), Linear Algebra, Principles of Database Systems, Probability Theory

Extracurriculars: Temple Data Analytics Club, Temple Data Science Community, Research Scholars Club

SKILLS

Programming Languages: Python, C, C++, Java, JavaScript, SQL, R, Bash

Technical Stack: TensorFlow, PyTorch, MongoDB, scikit-learn, Pandas, NumPy, Flask, FastAPI, Docker, Git

Adobe Tools: Adobe Experience Platform (AEP), Real-Time CDP, Customer Journey Analytics (CJA)

Other: Cloud Computing, ML/AI, Quantitative Research, Data Visualization, AWS, EDA, AI Agents, n8n, IoT

WORK EXPERIENCE

YAN IT Solutions PVT. LTD., Pune, Maharashtra **June 2025 – September 2025**
Data Analyst Intern

- Implemented Python pipelines to process IoT sensor data from MongoDB
- Monitored device health and predicted refill needs with machine learning (Linear Regression)
- Achieved a 40% improvement in predictive accuracy and a 35% reduction in downtime for over 230 devices
- Developed a FastAPI-based web service and dashboard (Chart.js) for live health status and refill trend visuals
- Enabled 33% faster decision-making and increased user interaction by 45% among 200+ stakeholders
- Deployed solutions to Azure App Services with secure configuration and scalable design
- Achieved 85% uptime and supported a 55% increase in data output for enterprise-level IoT operations

Natraj Beats LLC, Exton, PA **February 2025 – January 2026**
Web Developer & Consultant

- Architected the NatrajBeats platform via Lovable's AI framework, reducing time-to-market by 60%
- Engineered user telemetry and data-tracking mechanisms to drive quantitative client acquisition
- Automated the client booking pipeline and inquiry workflows, boosting inbound leads by 30%
- Optimized front-end UI/UX and technical SEO to improve cross-device performance and visibility

PROJECTS

SSP — Startup Success Predictor **Spring 2026**

- Built ML pipeline with 4 models (Random Forest, XGBoost, Gradient Boosting, Logistic Regression)
- Applied label encoding and StandardScaler to preprocess categorical and numerical features
- Developed Flask REST API with probability-based predictions across 3 success classes (IPO, Acquired, Private)
- Deployed model to production using WSGI server; model achieves 69.6% CV score and 70% test accuracy
- Built an interactive web dashboard with real-time prediction capabilities using JSON API endpoints

AROMA — Agentic Restaurant Order Management Automation **Fall 2025**

- Automated restaurant order processing via n8n agentic workflows, cutting manual time by 40%
- Integrated a Vapi conversational AI voice agent to manage inbound customer inquiries
- Engineered a real-time WhatsApp order notification system, decreasing follow-up calls by 60%
- Synchronized voice, order, and messaging systems to achieve a 95% automated response rate

CERTIFICATIONS

AI: AI & Productivity (Google), Generative AI Mastermind (Outskill), AI Agent Fundamentals (Databricks)

Development: Python (Santander), Quantitative Research J.P Morgan (Forage), SQL Essential Training (LinkedIn)
